Shop repairs are not always feasible. TEC can service your pumps on location when required.

From 0.5 HP to 500 HP, we've done it.

- On-Site Repair
- System analysis
- Replacement & Retrofits
- VFD Programming
- Troubleshooting
- Start-Up & Training
- Trained and experienced field technicians
- Vibration analysis
- Remote monitoring
- Field performance testing
- Fully insured for your protection

PLANNED MAINTENANCE

We offer customised maintenance programs for package pumping system for HYPN/HVAC/Fire fighting and water management systems.

Our planned maintenance schedule helps increase life of equipment and prevents system breakdowns.

CUSTOMER CARE

At Technomatics, we prioritise/our priority is customer care.

Our experienced service team are on call 24/7 to provide on-site repairs and reduce downtime. Our fully equipped service centre houses a large inventory of parts to ensure optimal customer service and lifetime support.

We offer end to end services from providing preventive maintenance and upkeep to complete equipment overhauls.

SERVICE CENTRE

We are a certified warranty repair centre manned by KBL factory-trained technicians.

Our technicians guarantee that all equipment will match industry specifications, and are committed to provide timely repair and service both on-site and at our service centre.

Our service centre is equipped with:

KBL factory-trained technicians are committed to quality repairs in a timely manner, either on location or in our shop. As a certified warranty repair center, you can rest assured that your equipment will be built to factory specifications.

TEC service center features the following equipment :

- One 2-Ton Jib Crane
- Pump Test Station for up to 50HP
- Machine Shop & Fabrication Shop
- Disassembly, cleaning and inspection services of pumps
- Surface blasting and Painting
- Specialty coatings for corrosion/erosion repair and performance
- Precision balancing
- Pump failure analysis and engineered solutions
- Mechanical seal repairs

MACHINING

Our experienced machinists specialise in machining parts for rotating equipment.

The machine shop is fully equipped with multiple lathes, milling machines, surface grinder and a dynamic balancing machine.

FABRICATION

Our certified welders are experienced in metal fabrication and specialise in customising pump packages to meet your specifications.

TEC offers a fully equipped machine shop and our machinists have decades of experience in machining parts for rotating equipment.

We specialize in providing our customers with quality machined parts, meeting deadlines and are committed to customer service.

Our works equipment list includes multiple lathes, milling machines, surface grinder and a dynamic balancing machine.

- Pump and Systems Skids
- Filtration Skids
- Pump Carts
- Coupling Guards and Base Plates

TRAINING

We offer training courses for care and maintenance of equipment to interested customers.

TEC engineers and technicians enjoy their work, but we also understand customers who want to learn how to take care of their own equipments,

- Comprehensive pump and seal training, designed for operators & maintenance staff
- Training at KOV facility
- Field training at any location
- KBL factory trained instructors

ENGINEERING

Customers benefit from our staff's extensive application engineering knowledge while choosing the right pump for maximal life at minimal cost.

TEC engineering staff is the bridge between factory design engineering and real world applications, helping you choose the right pump for maximum life and lowest cost of ownership.

- Comprehensive system analysis
- Predictive and preventive maintenance programs
- Root cause failure analysis, and engineered solutions
- Mechanical seal and other sealing solutions
- Final support documentation packages

VALUE ADDED SERVICES

Engineering Support: Our engineers offer customised process systems to optimise production.

Custom Built Skids and Fabrication: Our technical team has designed and built custom skids that fit seamlessly into any pumping application.

Commissioning and Start-Up: Our experienced staffs ensure optimal production and top of the line equipment performance from the onset.

After - sales Service and Repair: We as authorised service providers offer lifetime equipment maintenance and support.

Pump Testing : We test our pumps after service to ensure they match given specifications. We also conduct third party inspection at our service centre to oversee our supply equipment.

Inventory Management : Our comprehensive software system enables us to maintain a customer specific consignment program for easy product procurement and stocking.
